EDUCATION

1996-1999: Post-Doctoral Studies, Leukocyte Adhesion Laboratory, Imperial Cancer Research Fund, London, United Kingdom.
Supervisor: Dr Nancy Hogg

1992-1996: Ph.D., Department of Microbiology-Immunology, Faculty of Medicine, Université Laval, Ste-Foy, Québec, Canada.

Supervisor: Dr Paul H. Naccache, Co-Supervisor: Dr Shaun R. McColl Titre de la Thèse: "Expression et rôle physiologique des molécules d'adhésion et

des chimiokines dans l'inflammation synoviale".

« Visiting Fellow », Department of Microbiology and Immunology, The

01-05/1995: « Visiting Fellow », Department of Microbiology and Immunology, The University of Adelaide, Adelaide, Australia.

1994-1995: « School Visitor », Division of Clinical Sciences, The John Curtin School of

Medical Research, The Australian National University, Canberra, Australia.

1990-1992: M.Sc., Department of Physiology-Endocrinology, Faculty of Medicine, Université Laval, Ste-Foy, Québec, Canada.

Supervisor: Dr Shaun R. McColl, Co-Supervisor: Dr Marie Audette.

Titre du mémoire: "Expression et rôle physiologique de la ICAM-1 dans les fibroblastes synoviaux rhumatoïdes".

1987-1990: B.Sc., Department of Biochemistry, Faculty of Sciences, Université Laval, Ste-Foy, Québec, Canada.

ACADEMIC POSITION

1999-2004 Assistant Professor, Department of Medical Biology, Faculty of Medicine, Université Laval

2004-present Associate Professor, Department of Medical Biology, Faculty of Medicine, Université Laval

OTHER ACTIVITIES

2006-present Member, Commission des études, Université Laval
 2005-2007 President, CPE Centre Jour Management Board, Québec, Canada
 2003-present Member, Program committee, Microbiologie-Immunologie, Université Laval
 2002-present Université Laval's appointee, CPE Centre Jour Management Board, Quebec, Canada
 2004-2005 Treasurer, CPE Centre Jour, Québec, Canada
 1997-1998 Scientific writer, Le Matinternet (http://matin.qc.ca/indexcyra.html).

AWARDS

Scholarship	
2003-2007	Chercheur-boursier Junior 2, Fonds de la Recherche en Santé du Québec, Canada
1999-2003	Research Scholar, Arthritis Society of Canada, Canada
Post-Doctora	l studies
1997-2000	Fellowship, Medical Research Council of Canada, Canada
1997-2000	Fellowship, Imperial Cancer Research Fund, United Kingdom
1997-1999	Fellowship, Arthritis Society of Canada, Canada (declined)
1996-1998	Fellowship Arthritis Society of Canada / Medical Research Council of Canada, Canada (declined)
Ph.D.	
1991-1994	Studentship, Fonds de la Recherche en Sante du Québec, Canada
1991-1996	Studentship, Arthritis Society of Canada, Canada
GRANTS	
2007-2012	Role of S100A8, S100A9, and S100A12 in neutrophil migration to
2007 2012	inflammatory sites, \$125 498, Canadian Institutes of Health Research, Canada, principal investigator.
	Aim of the study: The aim of this grant is to determine the mechanism of action of S100 proteins in directing neutrophil migration to inflammatory sites, with a particular emphasis on inflammatory bowel diseases.
2007-2008	Effects of S100A8 and S100A9 inhibitors on collagen-induced arthritis,
2007-2008	\$50 000, Canadian Arthritis Network, Canada, principal investigator. Aim of the study: This grant is aimed at determining the role of S100A8 and
	S100A9 in a mouse model of arthritis.
2005-2010	The Multi-Cellular Basis of Urate-induced Arthropathies, US\$222 000/year, National Institutes of Health, U.S.A., co-investigator.
	Aim of the study: This grant is aimed at studying the effect of monosodium urate crystals on leukocytes.
2004-2005	Blockade of S100A8, S100A9, and S100A12 as a new treatment for arthritis, \$60,000/year, Institute of Musculoskeletal health and arthritis (Canadian Institutes of Health Research), Principal Investigator
	Aim of the study: This grant is aimed at generating blockers of S100A8, S100A9, and S100A12 and at testing these inhibitors as new therapeutic avenues for the treatment of arthritis
2003-2006	Development of a plant based vaccination platform for hepatitis C virus, \$185 404/year, Natural Sciences and Engineering Research Council, Canada, co-investigator.
	Aim of the study: This grant is aimed at generating an hepatitis C virus vaccine by modifying the Papaya Mosaic Virus to express hepatitis C virus proteins.
2002-2005	Role of S100A8, S100A9, and S100A12 in neutrophil migration to inflammatory sites, Principal Investigator, \$98,208/year, Canadian Institutes of

Health Reseach, Canada

Aim of this grant: This grant is aimed at cloning, sequencing and characterising the receptors for S100A8, S100A9, and S100A12.

- 2000-2001 Laboratoire d'étude de la migration des leucocytes. Co-investigator, \$195,953 (Total budget \$490,294), Canadian Foundation for Innovation, Canada Equipment grant for the purchase of an intravital videomicroscope and a confocal microscope.
- 2000-2001 **Starting Fund**, Principal Investigator, \$40,000, Régie Régional de la Santé et des Services Sociaux, Canada Equipment grant
- Inflammation in gout: Role of the MRP proteins, Principal Investigator, \$65,000/year Arthritis Society of Canada, Canada
 Aim of the study: This grant was aimed at investigating the involvement of \$100A8 and \$100A9 in the generation of the inflammatory response associated with gout.
- 1999-2001 **Rôle des protéines MRP dans l'inflammation de la goutte**. Principal Investigator, \$20,000/year, Fonds de la Recherche en Santé du Québec, Canada Equipment grant
- 1999-2000 **Persistant Organic Polluants (POPs) et inflammation**. Co-investigator, \$15,000 for one year, Réseau de recherche en santé environnementale FRSQ, Canada Aim of the study: This grant was a pilot study of the effect of the POPs dieldrin and toxaphen on human neutrophil functions.
- Subvention de démarrage, Principal Investigator, \$15,000, Centre de Recherche du CHUL

 Equipment grant

RESEARCH CONTRACTS

2001-2003 Use of MRPs to induce neutrophilia. Principal Investigator, \$238,600, Innovatech-Québec, Canada

COMMITTEE MEMBERSHIP

Peer review committees 2005-2007 Member, Strategic Training Program Grant Mid-Term Committee, CIHR

2001-2002 2000	Member, Immunology Committee, Arthritis Society grant program Invitee, Immunology Committee, Arthritis Society grant program
Meettings	
2006	Chairman, Colloque sur l'inflammation et l'apoptose, 48 th meeting of the Club de
	Recherches cliniques du Québec, Lac-à-l'Eau-Claire, Canada, September 2006
2006	Chairman, Workshop on Inflammation and Transplantation, Canadian Society for
	Immunology 19th Annual meeting, Halifax, June 2006
2003	Organiser, Microbiology, Virology and Immunology section, 71st ACFAS meeting,
	Rimouski, May 2003
2002-2004	Organiser, Social activities, 12th International Congress of Immunology, Montreal,
	July 2004
2002	Organiser, Microbiology, Virology and Immunology section, 70 th ACFAS
	meeting, Quebec City, May 2002

REVIEWER

Associate editor, Journal of Immunology (2007-present)

Reviewer

Acta Paediatrica
American Journal of Respiratory Care Critical Medicine
Arthritis Research & Therapy

SUPERVISORY EXPERIENCE

- 1. Alain Boulende, M.Sc. (co-supervisor), Microbiology-Immunology, Faculty of Medicine, Université Laval, 2005-2006.
- Jérôme Denis, Ph.D. (co-supervisor), Microbiology-Immunology, Faculty of Medicine, Université Laval, 2003-present.
- 3. Marie-Astrid Raquil, Ph.D., Microbiology-Immunology, Faculty of Medicine, Université Laval, 2003-present.
- 4. Nadia Anceriz, Ph.D., Microbiology-Immunology, Faculty of Medicine, Université Laval, 2003-present.
- 5. Pascal Rouleau, M.Sc., Microbiology-Immunology, Faculty of Medicine, Université Laval, 2002-2003.
- Carle Ryckman, Ph.D., Microbiology-Immunology, Faculty of Medicine, Université Laval, 1999-2004.

THESIS (REFEREE)

Ph.D.

- Jocelyn Roy
 Microbiology-Immunology, Faculty of medicine, Université Laval, 5 July 2007
 Examinator
- 2. Carle Ryckman

Microbiology-Immunology, Faculty of medicine, Université Laval, 25 Fébruary 2004 Supervisor

3. Claudine Matte

Microbiology-Immunology, Faculty of medicine, Université Laval, 15 February 2000 Examinator

M.Sc.

1. Marie-Christine Dumas

Microbiology-Immunology, Faculty of medicine, Université Laval, 9 May 2007 Examinator

2. Marie-Ève Champagne

Microbiology-Immunology, Faculty of medicine, Université Laval, 1 May 2007 Examinator

3. Catherine Matron

Microbiology-Immunology, Faculty of medicine, Université Laval, 20 Fébruary 2007 Examinator

4. Alain Boulende

Microbiology-Immunology, Faculty of medicine, Université Laval, 20 October 2006 Co-supervisor

5. Jean-François Gauthier

Microbiology-Immunology, Faculty of medicine, Université Laval, 4 October 2006 Examinator

6. Caroline Bélanger

Pharmacie, Faculté de pharmacie, Université de Montréal, 22 August 2006 Examinator

7. Valérie Garceau

Microbiology-Immunology, Faculty of medicine, Université Laval, 15 September 2003 Examinator

8. Claude Ratthé

INRS-IAF/Santé humaine, 3 June 2003

Examinator

9. Andrée Maheux

Microbiology-Immunology, Faculty of medicine, Université Laval, 10 February 2003 Examinator

10. Pascal Rouleau

Microbiology-Immunology, Faculty of medicine, Université Laval, 22 Janary 2003 Supervisor

11. Julie Nieminen

Microbiology-Immunology, Faculty of medicine, Université Laval, 17 January 2003 Examinator

12. Geneviève Lachance

Microbiology-Immunology, Faculty of medicine, Université Laval, 24 April 2002 Examinator

13. Marc Gauthier

INRS-IAF/Santé humaine, 15 October 2001

Examinator

14. Valérie Lavastre

INRS-IAF/Santé humaine, 17 September 2001

Examinateur externe

15. Frédéric Dallaire

Microbiology-Immunology, Faculty of medicine, Université Laval, 14 February 2001 Examinator

16. Martin Pelletier

INRS-IAF/Santé humaine, 29 September 2000

Examinator

17. Philippe Desaulniers

Microbiology-Immunology, Faculty of medicine, Université Laval, 19 June 2000 Examinator

18. Isabelle Filion

Microbiology-Immunology, Faculty of medicine, Université Laval, 20 October 1999 Examinator

TEACHING

Undergraduate (Total 37 hours)

2006-present Immunologie médicale (MCB-21551), 1 credit 15 heures (1er cycle)

Coordinator

2005-present Pharmacologie moléculaire (PHM2302, U. de Montréal), 3 credit, 2 heures (1er

cycle), Collaborator

2004-present Immunologie médicale (MCB-17902), 1 credit, 20 heures (1er cycle)

Coordinator

Graduate (Total 78 hours)

2003-present Séminaire I (MCB-62699), 1 credit, 30 heures

Coordinator

2003-present Séminaire II (MCB-64140), 1 credit, 30 heures

Coordinator

2003-present La réaction inflammatoire (MCB-63801), 3 crédits, 3 heures (2^e et 3^e cycles)

Collaborator

2003-present Cytokines, chimiokines et facteurs de croissance (PHM6034, U. de Montréal), 3

credits, 6 heures (2^e cycle), Collaborator

2000-present Immunopathogénèse des maladies infectieuses (MCB-63803), 3 credits, 3 heures

(2^e et 3^e cycles), Collaborator

2000-present Immunologie cellulaire (MCB-63602), 3 credits, 3 heures (2^e et 3^e cycles)

Collaborator

SUMMARY OIF RESEARCH

For the last ten years, I have been studying new cytokines (S100A8, S100A9, and S100A12), collectively referred to as myeloid related proteins. S100A8, S100A9, and S100A12 are small proteins expressed abundantly in the cytosol of neutrophils and at lower levels in monocytes. They exist as noncovalently bonded homodimers and form a noncovalent heterodimer called S100A8/A9 or calprotectin.

Massive levels of S100A8/A9 are observed in the feces and serum of patients who have Crohn disease and ulcerative colitis, as well as in the synovial fluids of patients with arthritis and gout. We have recently demonstrated that these proteins are essential to neutrophil migration. We and others demonstrated that they are secreted during neutrophil interaction with the endothelium. In addition, we demonstrated that S100A8, S100A9, and S100A12 are chemotactic for neutrophils and induce their adhesion to fibrinogen, fibronectin and endothelial cells. More importantly, up to 80% of neutrophil and macrophage migration to the inflamed lung alveoli is abrogated by anti-S100A8 and anti-S100A9. Contrarily to chemokines which are inducers of leukocyte migration, S100 proteins appear to be enhancers of neutrophil migration. This different activity could explain why blocking of S100A8 and S100A9 consistently leads to higher inhibition of leukocyte migration than blocking chemokines. Thus, they play a key role in leukocyte migration, but their exact mechanism of action remains largely unknown.

We presume that neutrophils release S100A8/A9 as they migrate to assist the migration of subsequent leukocytes. We are currently testing this hypothesis by examining the migration of leukocytes to inflammatory sites using intravital microscopy. In addition, we are investigating the role of S100A8/A9 in the mouse collagen-induced arthritis model, as well as in models of inflammatory bowel diseases.

High concentrations of S100 proteins in serum also occur in patients suffering of acute and chronic myeloid leukemia. We recently demonstrated that S100A8, S100A9, and S100A12 induce the release of neutrophils from the bone marrow to the peripheral blood. Unpublished observations indicate that S100A8, S100A9, and S100A12 induce the proliferation of acute and chronic leukemia cells at concentrations similar to those detected in the sera of leukemia patients. More importantly, addition of Abs against S100A8 and S100A9 blocked the proliferation of leukemia cells induced by autologous serum, suggesting S100 proteins may be secreted by leukemia cells to act in an autocrine fashion. Thus, we are currently investigating the roles of S100 proteins in cell proliferation.
